Election/Restrictions

1. Applicant's election of figures 1A-1C, drawn to claims 1-13, 15, 19-23, and 31-32 in the reply filed on 12/26/2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 21 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 21 recites the limitation "the interventional catheter" in lines 1 and 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-13, 15, 19-23, and 31-32 are rejected under 35 U.S.C. 102(e) as being anticipated by Gilson et al. (U.S. 6,336,934).

Art Unit: 3734

Note: Gilson et al teaches a guide wire (2) coupled to a vascular foam filter (1), wherein the foam filter having a plurality of recesses or openings (see fig.1); wherein partitions taper (at 7) proximal of the recesses; wherein the foam filter (1) disposed within a sheath (3); and further comprises a balloon catheter (Col. 9, lines 5-12 and Col. 12, lines 33-50).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Macoviak et al. (U.S. 6,361,545) discloses a perfusion foam filter catheter (figure 35).

2. This is a Continuation of applicant's earlier Application No. 09/957,482. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3734

the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
